

Dear Mayor Berry: I am outraged that the City has begun building a trail through the Bosque. The City reneged on its promise to allow the public to review and comment on specific design options before a final plan was selected. Constructing the trail was a breach of trust with Albuquerque residents who had worked long, and effectively, to come up with a consensus plan for the Bosque. The trail will harm the most ecologically sensitive part of the Bosque by increasing impacts on the river bank. Albuquerque's bosque is a unique treasure. **The City should suspend construction immediately and re-engage with the public in an open and transparent decision-making process.**
